Mecanismo «Conectar Europa»

CORE LNGas hive initiative has been selected by the European Commission among the projects submitted for the 2014 Connect Europe Facility (CEF) Transport Calls for the development of the Trans-European Transport Networks. The aim of the project is to develop a safe and efficient, integrated logistics and supply chain for LNG in the transport industry, particularly for maritime transport of the Iberian Peninsula. It involves 25 studies, to be conducted by the 42 partner companies for adaptation of infrastructure and logistical-commercial development in order to offer small-scale supply services and bunkering.
